

a Source-to-case ladder

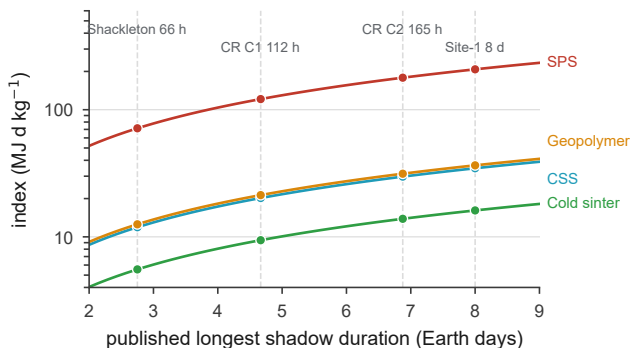

source	screening use in this manuscript
LROC WAC	annual illumination descriptors
NASA SVS	image-derived light/dark proxy
Glaser 20-yr maps	named-site longest-shadow durations
Barker Site-1	4-8 d longest shadow at 5 m
T2/T3 case	storage-sensitive burden index

Descriptor-to-sensitivity only; no T4 mission claim.

b SVS light/dark proxy sequence

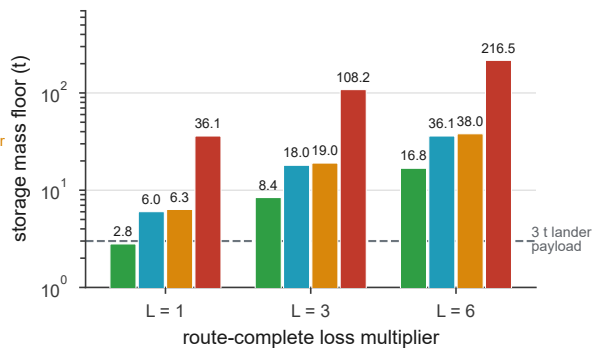

c Storage burden across published sites

Site heights: 2 m (Glaser) and 5 m (Site-1); published descriptors, no new modelling.

d Dark-gap storage-mass floor

1350 kg case at 270 Wh kg^{-1} cell-level best case; bounding screen, not a battery design.
